THE AERONAUTICAL JOURNAL

OF THE ROYAL AERONAUTICAL SOCIETY

Volume CVIII

January-December 2004

Subject Index

ACOUSTICS

Experimental and numerical investigation of confined unsteady supersonic flow over cavities. T.K.G. Anavaradham, B.U. Chandra, V. Babu, S.R. Chakravarthy and S. Panneerselvam, pp 135-144.

AERODYNAMICS

Active control of swept shock wave/turbulent boundary-layer interactions. J.S. Couldrick, S.L. Gai, J.F. Milthorpe and K. Shankar, pp 93-101.

Aerodynamic forces and moments on an ogive cylinder at incidence. S.C. Luo, Y.T. Ng and T.T. Lim, pp 311-314.

Application of generic algorithms in aerodynamic optimisation design procedures. R.P. Clayton and R.F. Martinez-Botas, pp 611-620.

Control of trailing-edge separation by tangential blowing inside the bubble. P.R. Viswanath and K.T. Madhavan, pp 419-425.

Effect of counter-rotating vortices on the development of aircraft wakes. A. Panaras and S.G. Voutsinas, pp 585-592.

Experimental and numerical aerodynamic analysis of a satellite launch vehicle with strap-on boosters. A. Naghib-Lahouti, M. Mani and M. Mazarinia, pp 379-387.

Experimental investigation on wall pressure distribution in flaps' separating regions. P.F. Zhang, J.J. Wang and Y.C. Li, pp 103-107.

Induced-drag reduction of wing-wings and wings-ground configurations. L. Marino, pp 523-530.

On self-similar behaviour of the hysteresis loops in pitching motions. M.R. Soltani and A.R. Davari, pp 427-434.

Oscillating behaviour of laminar separation bubble formed on an aerofoil near stall. K. Rinoie and N. Takemura, pp 153-163.

Recent developments in delta-wing aerodynamics. I. Gursul, pp 437-452.

The effect of flap-end additions on aircraft trailing vortices. W.R. Graham, T. Berteny and L. David, pp 109-115.

Unsteady aerodynamic model of a cargo container for slung-load simulation. L.S. Cicolani, J.G.A da Silva, E.P.N. Duque and M.B. Tischler, pp 357-368.

Vortex breakthrough location over 65° delta wings empiricism and experiment. C.E. Jobe, pp 475-482.

Vortex flows on UAVs: issues and challenges. I. Gursul, pp 597-610.

Wind-tunnel interference effects on a 70° delta wing. M.R. Allan, K.J. Badcock, G.N. Barakos and B.E. Richards, pp 505-513.

AEROELASTICITY

Aerolastically adaptive propeller using blades' root flexibility. Y. Sandak and A. Rosen, pp 411-418.

Analysis of anisotropic prismatic sections. G.F.J. Hill and P.M. Weaver, pp 197-205.

Closed-loop flutter control using strain actuation. S.B. Kandagal and K. Venkatraman, pp 271-275.

AEROSPACE ENGINEERING

Experimental and numerical aerodynamic analysis of a satellite launch vehicle with strap-on boosters. A. Naghib-Lahouti, M. Mani and M. Mazarinia, pp 379-387.

Optimising expansion deflection nozzles for vacuum thrust. N.V. Taylor and C.M. Hempsell, pp 515-522.

Robotic in-orbit servicers — the need for control moment gyroscopes for attitude control. A. Ellery, pp 207-214.

Spacecraft control with constrained fast orientation and accurate pointing. G. Mengali and A.A. Quarta, pp 85-91.

BODIES

Aerodynamic forces and moments on an ogive cylinder at incidence. S.C. Luo, Y.T. Ng and T.T. Lim, pp 311-314.
Control of plume interference effects on axisymmetric afterbodies. Y-K. Lee, S. Raghunathan, E. Benard, H-D. Kim, T. Setoguchi, G.F.J. Hill and P.M. Weaver, pp 185-196.

BOOK REVIEWS — BY AUTHOR

No author cited. Finite Element Multidisciplinary Analysis — Second edition, p 61.
Brandt, S.A. *et al* Introduction to Aeronautics: a Design Perspective — Second edition, p 539.

The Bird is on the Wing: Aerodynamics and the Progess of the American Airplane, J.R. Hansen, p 536.
The Handbook of Advanced Materials: Enabling New Designs. J.K. Wessel (Ed), p 538.

COMPOSITES
Impact on composite structures. G.A.O. Davies and R. Olsson, pp 541-563.
Technical Note: Notched strength estimations of graphite/epoxy composite laminates containing central holes and cracks: A statistical approach. P.K.G. Potti, B.N. Rao and V.K. Srivastava, pp 263-269.

COMPUTATIONAL FLUID DYNAMICS
A structure-coupled CFD method for time-marching flutter analysis. N.N.V. Taylor, C.B. Allen, A. Gaitonde, pp 389-401.
Experimental and numerical aerodynamic analysis of a satellite launch vehicle with strap-on boosters. A. Naghib-Lahouti, M. Mani and M. Mazarinia, pp 379-387.

COMPUTATIONAL TECHNIQUES (GENERAL)
Control of plume interference effects on axisymmetric afterbodies. Y-K. Lee, S. Raghunathan, E. Benard, H-D. Kim, T. Setoguchi, G.F.J. Hill and P.M. Weaver, pp 185-196.
Derivation of control activity metrics for the rule-based prediction of helicopter pilot workload. C.A. Macdonald and R. Bradley, pp 245-254.
Fuel sensitivity analyses for active drag reduction systems. T.M. Young, pp 215-221.

DEFENCE
A question of survival — military aircraft *vs* the electromagnetic environment. M. Pyewell, pp 453-464.
Air-to-ground targeting — UAVs, data links and interoperability (project Extendor). K.L. Edwards, pp 493-504.

DESIGN
Design criteria for conceptual sizing of primary flight controls. A.J. Steer, pp 629-641.
Fuel sensitivity analyses for active drag reduction systems. T.M. Young, pp 215-221.
HELIPLAT®: high altitude very-long endurance solar powered UAV for telecommunication and Earth observation applications. G. Romeo and G. Frulla, pp 277-293.

DYNAMICS
Design criteria for conceptual sizing of primary flight controls. A.J. Steer, pp 629-641.
Dynamic modelling and stability of hingeless helicopter blades with a smart spring. F.F. Afagh, F. Nitzche and N. Morozova, pp 369-377.
Dynamics and control of different aircraft formation structures. F. Giulietti and G. Mengali, pp 117-124.
State-space inflow modelling for lifting rotors with mass injection. K. Yu and D.A. Peters, pp 333-344.
The longitudinal flying qualities of a blended-wing-body civil transport aircraft. M.V. Cook and H.V. de Castro, pp 75-84.

FLIGHT CONTROL
A novel method for the provision of flight experience and flight testing for undergraduate aeronautical engineers at the University of Strathclyde. M.J. Stickland and T.J. Scanlon, pp 315-318.
Design of formation control laws for manoeuvred flight. G. Campa, S. Wan, M.R. Napolitano, B. Seanor and M.L. Fravolini, pp 125-134.
Supersonic transport aircraft longitudinal flight control law design. A.J. Steer, pp 319-329.

FLUID MECHANICS
Control of plume interference effects on axisymmetric afterbodies. Y-K. Lee, S. Raghunathan, E. Benard, H-D. Kim, T. Setoguchi, G.F.J. Hill and P.M. Weaver, pp 185-196.
Linear and non-linear turbulence model predictions of vortical flows in lobed mixers. H. Salman, D. Jiang, G.J. Page and J.J. McGuirk, pp 65-73.

HISTORY
The Fairey Rotodyne — technology before its time?. D. Gibbings, pp 565-574.

JETS
A turbulence model study of separated 3D jet/afterbody flow. R.G.M. Hasan, J.J. McGuirk, D.D. Apsley and M.A. Leschziner, pp 1-14.
An experimental and numerical investigation of under-expanded turbulent jets. A.J. Saddington, N.J. Lawson and K. Knowles, pp 145-152.
Studies on high speed jets from nozzles with internal grooves. S. Elangovan and E. Rathakrishnan, pp 43-50.

MATERIALS
Technical Note: Notched strength estimations of graphite/epoxy composite laminates containing central holes and cracks: A statistical approach. P.K.G. Potti, B.N. Rao and V.K. Srivastava, pp 263-269.

PROPULSION
Aerolastically adaptive propeller using blades' root flexibility. Y. Sandak and A. Rosen, pp 411-418.
Effects of hydrogen-air non-equilibrium chemistry on the performance of a model scramjet thrust nozzle. R.J. Stalker, N.K. Truong, R.G. Morgan and A. Paull, pp 575-584.
Enhancement of thrust reverser cascade performance using aerodynamic and structural integration. J. Butterfield, H. Yao, M. Price, C. Armstrong, S. Raghunathan, E. Benard, R. Cooper and D. Monaghan, pp 621-628.
Flow visualisation experiments for turbine film cooling. C.A. Coat and G.D. Lock, pp 403-409.
Linear and non-linear turbulence model predictions of vortical flows in lobed mixers. H. Salman, D. Jiang, G.J. Page and J.J.McGuirk, pp 65-73.
Optimising expansion deflection nozzles for vacuum thrust. N.V. Taylor and C.M. Hempsell, pp 515-522.

ROTORCRAFT
A wind-tunnel based study of helicopter tail rotor blade vortex interaction. F.N. Coton, R.A.McD. Galbraith, T. Wang and S.J. Newman, pp 237-244.
Analysis of anisotropic prismatic sections. G.F.J. Hill and P.M. Weaver, pp 197-205.
Control laws for an active tunable vibration absorber designed for rotor blade damping augmentation. F. Nitzsche, D.G. Zimcik, V.K. Wickramasinghe and C. Yong, pp 35-42.

Derivation of control activity metrics for the rule-based prediction of helicopter pilot workload. C.A. Macdonald and R. Bradley, pp 245-254.
Dynamic modelling and stability of hingeless helicopter blades with a smart spring. F.F. Afagh, F. Nitzche and N. Morozova, pp 369-377.
Load alleviation in tilt rotor aircraft through active control: modelling and control concepts. B. Manimala, G.D. Padfield, D. Walker, M. Naddei, L. Verde, U. Ciniglio, P. Rollet and F. Sandri, pp 169-184.
Modelling a helicopter rotor's response to wake encounters. G.R. Whitehouse and R.E. Brown, pp 15-26.
Multigrid multiblock hovering rotor solutions. C.B. Allen, pp 255-261.
State-space inflow modelling for lifting rotors with mass injection. K. Yu and D.A. Peters, pp 333-344.
Technical Note: An investigation of the flight dynamic characteristics of gyroplanes by use of flight tests. V.M. Spathopoulos, pp 531-535.
The Fairey Rotodyne — technology before its time?. D. Gibbings, pp 565-574.
Validation of a rotorcraft mathematical model in autorotation by use of gyroplane flight tests. V.M. Spathopoulos, pp 51-58.

SAFETY
Airspace safety in New Zealand: A causal analysis of controller caused airspace incidents between 1994 - 2002. A. Maajumdar, W.Y. Ochieng and P. Nalder, pp 225-236.
Consistent and up-to-date aviation safety targets. P. Brooker, pp 345-356.
Derivation of control activity metrics for the rule-based prediction of helicopter pilot workload. C.A. Macdonald and R. Bradley, pp 245-254.

SHOCK WAVES
Active control of swept shock wave/turbulent boundary-layer interactions. J.S. Couldrick, S.L. Gai, J.F. Milthorpe and K. Shankar, pp 93-101.
Technical Note: Investigation of active control of swept shock wave/turbulent boundary-layer interactions — PSP results. J.S. Couldrick, S.L. Gai, J.F. Milthorpe and K. Shankar, pp 483-490.

SYSTEMS
A question of survival — military aircraft *vs* the electromagnetic environment. M. Pyewell, pp 453-464.
Air-to-ground targeting — UAVs, data links and interoperability (project Extendor). K.L. Edwards, pp 493-504.

TESTING FACILITIES AND TECHNIQUES
A wind-tunnel based study of helicopter tail rotor blade vortex interaction. F.N. Coton, R.A.McD. Galbraith, T. Wang and S.J. Newman, pp 237-244.
Achieving drag measurement accuracy from a high load capacity internal balance design. R. Porter, pp 643-648.
Design methodology and performance of an indraft wind tunnel. G. Johl, M. Passmore and P. Render, pp 465-473.
Technical Note: Investigation of active control of swept shock wave/turbulent boundary-layer interactions — PSP results. J.S. Couldrick, S.L. Gai, J.F. Milthorpe and K. Shankar, pp 483-490.
Wind-tunnel interference effects on a 70° delta wing. M.R. Allan, K.J. Badcock, G.N. Barakos and B.E. Richards, pp 505-513.

UNMANNED AIR VEHICLES
Air-to-ground targeting — UAVs, data links and interoperability (project Extendor). K.L. Edwards, pp 493-504.
HELIPLAT®: high altitude very-long endurance solar powered UAV for telecommunication and Earth observation applications. G. Romeo and G. Frulla, pp 277-293.
Vortex flows on UAVs: issues and challenges. I. Gursul, pp 597-610.

UNSTEADY AERODYNAMICS
On self-similar behaviour of the hysteresis loops in pitching motions. M.R. Soltani and A.R. Davari, pp 427-434.
Unsteady aerodynamic model of a cargo container for slung-load simulation. L.S. Cicolani, J.G.A da Silva, E.P.N. Duque and M.B. Tischler, pp 357-368.

VIBRATION
Control laws for an active tunable vibration absorber designed for rotor blade damping augmentation. F. Nitzsche, D.G. Zimcik, V.K. Wickramasinghe and C. Yong, pp 35-42.

WAKES
Effect of counter-rotating vortices on the development of aircraft wakes. A. Panaras and S.G. Voutsinas, pp 585-592.
Modelling a helicopter rotor's response to wake encounters. G.R. Whitehouse and R.E. Brown, pp 15-26.
Multigrid multiblock hovering rotor solutions. C.B. Allen, pp 255-261.
On wake vortex response for all combinations of five classes of aircraft. L.M.B.C. Campos and J.M.G. Marques, pp 295-310.
The effect of flap-end additions on aircraft trailing vortices. W.R. Graham, T. Berteny and L. David, pp 109-115.
Vortex breakthrough location over 65° delta wings. empiricism and experiment. C.E. Jobe, pp 475-482.
Vortex interaction and breakdown over double-delta wings. S.L. Gai, M. Roberts, A. Barker, C. Kleczaj and A.J. Riley, pp 27-34.

Author Index

AFAGH, F.F., NITZCHE, F. and MOROZOVA, N.
Dynamic modelling and stability of hingeless helicopter blades with a smart spring, pp 369-377.

ALLAN, M.R., BADCOCK, K.J., BARAKOS, G.N. and RICHARDS, B.E.
Wind-tunnel interference effects on a 70° delta wing, pp 505-513.

ALLEN, C.B.
Multigrid multiblock hovering rotor solutions, pp 255-261.

ALLEN, C.B., GAITONDE, A. and TAYLOR, N.N.V.
A structure-coupled CFD method for time-marching flutter analysis, pp 389-401.

ANAVARADHAM, T.K.G., CHANDRA, B.U., BABU, V., CHAKRAVARTHY, S.R. and PANNEERSELVAM, S.
Experimental and numerical investigation of confined unsteady supersonic flow over cavities, pp 135-144.

APSLEY, D.D., LESCHZINER, M.A, HASAN, R.G.M. and MCGUIRK, J.J.
A turbulence model study of separated 3D jet/afterbody flow, pp 1-14.

ARMSTRONG, C., RAGHUNATHAN, S., BENARD, E., COOPER, R., MONAGHAN, D., BUTTERFIELD, J., YAO, H. and PRICE, M.
Enhancement of thrust reverser cascade performance using aerodynamic and structural integration, pp 621-628.

ANAVARADHAM, T.K.G., CHANDRA, B.U., BABU, V., CHAKRAVARTHY, S.R. and PANNEERSELVAM, S.
Experimental and numerical investigation of confined unsteady supersonic flow over cavities, pp 135-144.

BADCOCK, K.J., BARAKOS, G.N., RICHARDS, B.E. and ALLAN, M.R.
Wind-tunnel interference effects on a 70° delta wing, pp 505-513.

BARAKOS, G.N., RICHARDS, B.E., ALLAN, M.R. and BADCOCK, K.J.
Wind-tunnel interference effects on a 70° delta wing, pp 505-513.

BARKER, A., KLECZAJ, C., RILEY, A.J., GAI, S.L. and ROBERTS, M.
Vortex interaction and breakdown over double-delta wings, pp 27-34.

BENARD, E., KIM, H-D., SETOGUCHI, T., HILL, G.F.J., WEAVER, P.M., LEE, Y-K. and RAGHUNATHAN, S.
Control of plume interference effects on axisymmetric afterbodies, pp 185-196.

BENARD, E., COOPER, R., MONAGHAN, D., BUTTERFIELD, J., YAO, H., PRICE, M., ARMSTRONG, C. and RAGHUNATHAN, S.
Enhancement of thrust reverser cascade performance using aerodynamic and structural integration, pp 621-628.

BERTENY, T., DAVID, L. and GRAHAM, W.R.
The effect of flap-end additions on aircraft trailing vortices, pp 109-115.

BRADLEY, R. and MACDONALD, C.A.
Derivation of control activity metrics for the rule-based prediction of helicopter pilot workload, pp 245-254.

BROOKER, P.
Consistent and up-to-date aviation safety targets, pp 345-356.

BROWN, R.E. and WHITEHOUSE, G.R.
Modelling a helicopter rotor's response to wake encounters, pp 15-26.

BUTTERFIELD, J., YAO, H., PRICE, M., ARMSTRONG, C., RAGHUNATHAN, S., BENARD, E., COOPER, R. and MONAGHAN, D.
Enhancement of thrust reverser cascade performance using aerodynamic and structural integration, pp 621-628.

CAMPA, G., WAN, S., NAPOLITANO, M.R., SEANOR, B. and FRAVOLINI, M.L.
Design of formation control laws for manoeuvred flight, pp 125-134.

CAMPOS, L.M.B.C. and MARQUES, J.M.G.
On wake vortex response for all combinations of five classes of aircraft, pp 295-310.

CHAKRAVARTHY, S.R., PANNEERSELVAM, S., ANAVARADHAM, T.K.G., CHANDRA, B.U. and BABU, V.
Experimental and numerical investigation of confined unsteady supersonic flow over cavities, pp 135-144.

CHANDRA, B.U., BABU, V., CHAKRAVARTHY, S.R., PANNEERSELVAM S. and ANAVARADHAM, T.K.G.
Experimental and numerical investigation of confined unsteady supersonic flow over cavities, pp 135-144.

CICOLANI, L.S., DA SILVA, J.G.A., DUQUE, E.P.N. and TISCHIER, M.B.
Unsteady aerodynamic model of a cargo container for slung-load simulation, pp 357-368.

CINIGLIO, U., ROLLET, P., SANDRI, F., MANIMALA, B., PADFIELD, G.D., WALKER, D., NADDEI, M. and VERDE, L.
Load alleviation in tilt rotor aircraft through active control: modelling and control concepts, pp 169-184.

CLAYTON, R.P. and MARTINEZ-BOTAS, R.F.
Application of generic algorithms in aerodynamic optimisation design procedures, pp 611-620.

COAT, C.A. and LOCK, G.D.
Flow visualisation experiments for turbine film cooling, pp 403-409.

COOK, M.V. and DE CASTRO, H.V.
The longitudinal flying qualities of a blended-wing-body civil transport aircraft, pp 75-84.

COOPER, R., MONAGHAN, D., BUTTERFIELD, J., YAO, H., PRICE, M., ARMSTRONG, C., RAGHUNATHAN, S. and BENARD, E.
Enhancement of thrust reverser cascade performance using aerodynamic and structural integration, pp 621-628.

COTON, F.N., GALBRAITH, R.A.MCD., WANG, T. and NEWMAN, S.J.
A wind-tunnel based study of helicopter tail rotor blade vortex interaction, pp 237-244.

COULDRICK, J.S., GAI, S.L., MILTHORPE, J.F. and SHANKAR, K.
Active control of swept shock wave/turbulent boundary-layer interactions, pp 93-101.

COULDRICK, J.S., GAI, S.L., MILTHORPE, J.F. and SHANKAR, K.
Technical Note: Investigation of active control of swept shock wave/turbulent boundary-layer interactions — PSP results, pp 483-490.

DA SILVA, J.G.A., DUQUE, E.P.N., TISCHIER, M.B. and CICOLANI, L.S.
Unsteady aerodynamic model of a cargo container for slung-load simulation, pp 357-368.
